

MANUFACTURES CUSELL, S.L.

Manufactures Cusell specialize in the production of cap liners for the packaging industry.

Manufacturers of bottle tops, caps, lids, jerry cans, jars, bottles and other types of package units for pharmaceutical, chemical, foodstuff and industrial packaging entrust us to supply them with liners in a wide selection of specific materials, including the most prestigious brands on the international market. We have single layer, double layer and multi layer products for any application, in non migrating materials, with or without films, with or without adhesive, induction seals,...

Materials:

- LDPE/HDPE closed or open cell structure in multiple thicknesses, densities and colours.
- LDPE/HDPE with film barrier on one or both sides.
- EVA/LDPE
- Foamed or solid EVA.
- Cork and cork/rubber.
- Pressure Sensitive®.
- Aluminium.
- Polypropylene.
- Adhesives with or without mesh or tissue.
- According to clients criteria.

The liners can be manufactured kiss-cut in rolls or full cut.

We can also offer you the production of seals for cosmetics and pharmaceutical spray pumps, in silicone or any other material.

We welcome your enquiry and look forward to offer you our services.
